Education

UNIVERSITY of WASHINGTON BOTHELL

Bothell, WA

Bachelor of Science in Computer Science and Software Engineering,

GPA 3.8 | Expected: Winter 2026

- **Related Coursework:** Object-Oriented Programming, Data Structures and algorithms, Calculus, Linear Algebra, Analysis and Design, Databases, Operating Systems

Experience

MERCURY'S COFFEE

Bothell, WA

Lead Barista, Mercury's Coffee (2025–Present) & Wake Up Call (2023–2025)

March 2023 - Current

- Led and trained a team of 5+ baristas, improving service efficiency during peak hours
- Designed workflow improvements that reduced average customer wait time by 15%
- Coordinated team operations in high-pressure environments, ensuring consistent quality and speed

Projects

Screen Time App (SwiftUI + Supabase)

Current

- Building an iOS application using SwiftUI and Apple's Screen Time APIs to promote healthy device usage through accountability features.
- Designing a Supabase backend with authentication, PostgreSQL, Row Level Security (RLS), and REST APIs.
- Implementing friend request, focus sessions, and scalable MVVM architecture

MOOD TRACKER (Full-Stack Web App)

September 2025

- Built a full-stack web app using React, Node.js, Express and PostgreSQL to track user mood trends
- Designed RESTful APIs and database schema to support reliable data storage and retrieval
- Implemented real-time UI updates, improving user interaction and feedback visibility
- Organized project architecture using modular routing, middleware and environment configuration

POLLPAL (Election Information Platform) for Husky Hackathon

Team Member

April 2025

- Developed a full-stack application to provide accessible local election data
- Built and integrated a custom Node.js/Express API for dynamic data delivery
- Deployed application on AWS, gaining experience with cloud infrastructure and CI/CD workflows
- Collaborated in a 48-hour hackathon to design and build a functional prototype
- Contributed to system design, development, and debugging in a fast-paced environment
- Awarded 2nd place for technical execution and project impact

Cyber Security Experience

- Performed network log analysis to identify suspicious activity and reconstruct timelines
- Conducted STRIDE threat modeling to identify vulnerabilities and recommend mitigations
- Applied authentication, access control, risk assessment, and incident response principles through hands on security labs

Skills & Interests

Programming Languages: JavaScript, Typescript, C++, Python, HTML/CSS, SQL

Frameworks/Tools: React, Node.js, Express, Git, GitHub, AWS

Concepts: Data Structures and Algorithms, Rest APIs, Full-Stack Development, Authentication

Interests: Climbing, Backpacking, Board Games, Tennis, Fishing
